3 people per car

5.800 euros

Double room

6.800 euros

Single room

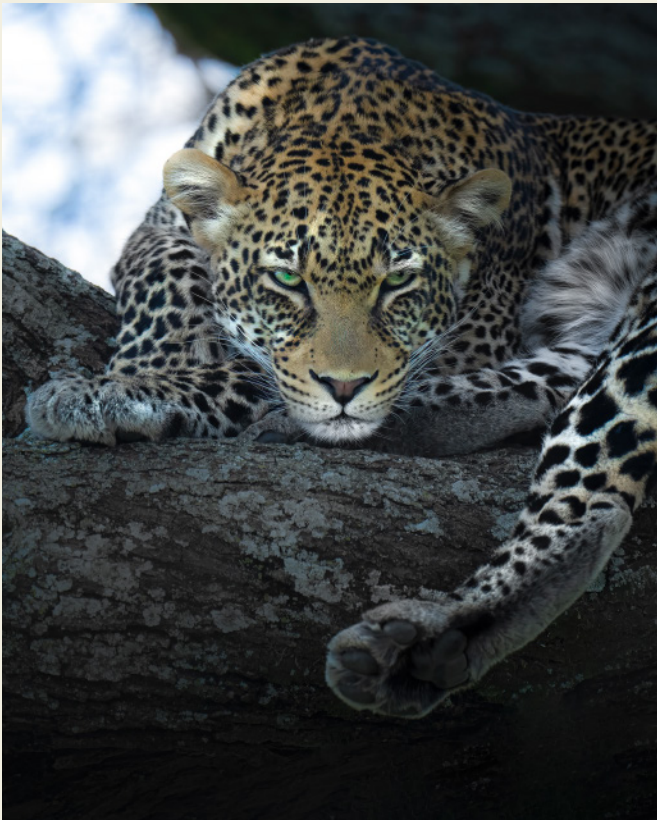

GENERAL DESCRIPTION

Our African adventure begins in the **Ndutu area**. During this season, the large herds of herbivores are scattered between the **Serengeti** area and the **northern part of the Ngorongoro** Conservation Area, in search of fresh pastures, followed by predators. During this period, thousands of herbivore offspring are born, providing a unique opportunity to witness the **circle of life** in the midst of the **migratory journey**.

As it's the **wet season**, occasional rainfall may occur. However, it's the ideal time to visit this vast plain where most of the **wildlife can be found**. Additionally, during this time, you may witness hunting scenes, as the newborn offspring are vulnerable despite the protection of the herd.

The other **major highlight** of our trip is **the Ngorongoro Crater**, within which an **immense concentration of wildlife** coexists. The Ngorongoro Crater is a **UNESCO World Heritage Site**. It's the largest intact **volcanic caldera** on the planet and is considered the **eighth wonder of the world**.

It's a natural amphitheater surrounded by **600-meter-high walls**, with a diameter of **20 kilometers**, housing one of the **world's densest populations** of large mammals. On a single day of safari, you can see an **astonishing variety** of animals, including the big predators.

TRIP ITINERARY

DAY 1

(January 28)

Pick-up (Kilimanjaro International Airport)
and transfer to the hotel (Arusha).
Rest.
